WEB DEVELOPER | DATA ANALYST

A developer and data analyst focused on building high-performance, responsive web applications while creating reliable data systems that turn complex information into clear, useful insights. Operating on the principle that user interfaces should be highly engaging, smooth, and easy to navigate, I use technical precision to build smart, real-world automation tools. My objective is to deliver reliable digital solutions driven by data accuracy and user-centered design

TECHNICAL SKILLS

- Python, JavaScript, PHP, C++, Java, HTML5, CSS
- React.js, React Native, Tailwind CSS, NumPy, Pandas, Tkinter, Canva
- Power BI, Microsoft Excel, MySQL, JSON, REST APIs (HTTP Requests)
- SQL, PostgreSQL, Supabase
- DSA, BFS / DFS, Backtracking, Hashing
- Cisco Packet Tracer, VMware, UltraISO, Spyder
- VS Code, Android Studio
- Git, GitHub, Google Colab, phpMyAdmin
- Jupyter Notebook, XAMPP

CORE COMPETENCIES

- Data Analysis & Interpretation
- Data Cleaning & Preprocessing
- Strategic Planning
- Database Management
- Problem Solving
- UI/UX Design
- Team Collaboration
- Communication Skills |
- Adaptability & Learning

PROJECTS

Sentimental Academia: Student Evaluation Bias Analysis at FJWU

March 2026 – Present

Manual Collected Data + Official Departmental Data. Worked on survey design, data preprocessing, analytical reporting. Thematic analysis, and data visualization techniques on qualitative student feedback.

- Research focused on behavioral analysis and sentiment analysis of student evaluation biases at FJWU. This research has confidential data in it, so most of the part will not be displayed here.

Degree vs. Skill: Are FJWU Students Truly Job-Ready?

April 2026 – Present

- Developed the end-to-end data pipeline to clean, merge, and wrangle multi-source survey datasets from 108 respondents in Python.
- Executed Exploratory Data Analysis (EDA) to map the statistical gaps between academic performance (CGPA) and practical industry skills.
- Formulated data-driven reporting to isolate key trends in student employment confidence, internship exposure, and curriculum mismatches.

SmartLib – Smart University Library Software

Oct, 2025

Web & Mobile Application | PHP & MySQL (Web) | React Native & Supabase (Mobile)

- A centralized library management system that automates book issuance, return, user registration, and fine calculation.
- Aims to provide both web and mobile interfaces for students and librarians for real-time access and updates.
- Incorporates QR code scanning, user authentication, and data analytics to enhance the library experience.
- Designed to improve resource accessibility, reduce manual workload, and promote smart campus initiatives.

Grocery Management System

Aprl, 2025

Web-based Application | PHP, MySQL, HTML, CSS, XAMPP

- Designed and developed a web-based system to manage grocery store operations including billing, inventory control, customer records, data validation and payment tracking.
- CRUD operations with MySQL for real-time data handling, database management.

Robot Navigation Puzzle (Knight's Travails)

Dec, 2024

Python | Artificial Intelligence & Algorithms

- Interactive simulation to visualize BFS and DFS algorithms in solving a grid-based navigation problem.
- Simulated a robot's movement (modeled on the chess knight) to demonstrate shortest-path finding and search efficiency.
- Integrated real-time animations using Tkinter to make algorithmic visualization intuitive and engaging.
- Enhanced understanding of AI search algorithms and path optimization techniques

Python | Speech Recognition & Graph Algorithms

- Developed a voice-controlled campus navigation assistant that helps users locate university departments and facilities.
- Integrated speech recognition for user input and text-to-speech (TTS) for system responses, ensuring an interactive experience.
- Applied graph-based shortest path algorithms (like Dijkstra's) for route computation and efficient navigation.
- Designed to assist new students and visitors in exploring campus locations conveniently.
- Speech Recognition, NLP

Text-to-Speech (TTS)

AI Pathfinding using Algorithms

LEADERSHIP & ENGAGEMENT

Class Representative

- Assisted class fellows in resolving academic and technical issues while coordinating smoothly between students and teachers to arrange meetings.

Digital Marketing & Media Intern | International Model United Nations (IMUN)

- Executed comprehensive digital marketing strategies and designed professional social media carousel assets to maximize global conference reach.

Certificates:

- AI-Integrated Aspire Leaders Program | Aspire Institute (Founded by Harvard Faculty) Dec 2025
- Aspire Leaders Program | Aspire Institute Dec 2025

CERTIFICATIONS

- Google IT Automation with Python Specialization
- Google Data Analytics Specialization
- Google Project Management Specialization
- Google Business Intelligence
- Certificate of Merit: 7th Annual PGC Science & Robotics Exhibition | Punjab Group of Colleges (Rawalpindi-Islamabad) – 2023

PROFESSIONAL EXPERIENCE

SaaS & Web Development Intern | TechCognify

Apr 2026 – Present

- Contributing to live SaaS applications by engineering scalable frontend architectures and responsive web components.
- Collaborating with development teams to optimize UI/UX layouts and full-stack integration workflows.

Data Analytics Intern | CodeAlpha

Apr 2026 – Present

- Executed end-to-end data pipelines involving dataset cleaning, exploratory data analysis, and statistical modeling using Python.
- Developed predictive machine learning models and interactive visualizations to interpret complex data trends and generate insights.

Front-End Development Intern | DevelopersHub Corporation

Jan 2026 – Feb 2026

- Developed responsive, user-centric web applications while adhering to professional code optimization standards.
- Practiced Agile workflows and version control to collaborate on real-world interface problem-solving.

Campus Ambassador Intern | International Model United Nations (IMUN)

Feb 2026 – Mar 2026

- Managed digital marketing and outreach campaigns to drive international conference registrations.
- Designed professional social media assets and carousels to scale community engagement.

TECHNICAL INTERESTS

- AI-Driven Web & Mobile Application Development
- Human-Computer Interaction (HCI) & UI/UX Design
- Data Analytics, Visualization & Automation Tools
- Emerging Software Trends & Technical Research

EDUCATION

Bachelor's in Computer Science

Fatima Jinnah Women Univeristy

3.44/4

Intermediate in ICS

Punjab Group of Colleges (Ayub Park Campus Rawalpindi)

FSC in ICS – 83.2
